EDUCATION

University of Alabama

Bachelor of Arts in English, Minor in Sociology

Tuscaloosa, AL

Aug. 2021 – Aug. 2025

EXPERIENCE

AI Data & Evaluation Analyst

Feb. 2024 – Present

Freelance

Remote

- Analyzed unstructured RLHF preference datasets across 24 prompt categories, using weighted scoring (-3 to +3 scale) to evaluate model performance trends
- Applied text similarity analysis (Python, thefuzz) to measure response diversity across models
- Built heatmaps, QQ plots, and summary visualizations to communicate findings
- Created project dashboards highlighting KPIs and target dates, using Excel/VBA
- Synthesized quantitative results and annotator feedback into structured model improvement recommendations for a variety of AI companies, including Google and Anthropic

Middle School Ministry Team Lead

Aug. 2023 – May 2025

Trinity Presbyterian Church

Tuscaloosa, AL

- Led weekly discussions centered on personal and spiritual formation
- Assisted with planning and infrastructure for a 400+ person congregation through weekly meetings
- Translated complex theological concepts into practical guidance for diverse groups of students, during both small and large group time

Substation Design Intern

May 2023 – Aug. 2023

Southern Company

Birmingham, AL

- Used AutoCAD and modeling software to update layout schematics for 3 ongoing substation redesign projects
- Contributed to efficient project lifecycle management through maintenance of component records and technical reference files in legacy software
- Led a brief presentation for engineers on home safety topics
- Painstakingly converted archival drawings created in MEDUSA to industry-standard AutoCAD .dwg files

PROJECTS

Nook - Lead Developer | *Swift, SwiftUI, WebKit, macOS*

Jul. 2025 – Present

- Took on role as lead dev for Nook, a WebKit-based browser for macOS with 1.8k GitHub stars
- Built and led a 12-person distributed team, driving product strategy, strategic growth, and release coordination
- Analyzed GitHub issue trends and community feedback to inform feature prioritization on Linear
- Grew Discord community to 600+ users through targeted posts on platforms such as Reddit and Hacker News

Homelab | *Docker, Cloudflare, Network Security*

Feb. 2025 – Present

- Built a headless Debian Linux environment for use as a personal server, loading over 10 containerized apps via Docker for scalable deployment of gaming servers and personal tools
- Implemented network and security hardening using Cloudflare, configuring access policies to improve uptime, reduce attack surface, and centralize tunnel management
- Used open-source software to bring SaaS apps in-house, moving to OSS solutions for personal finance, recipe management and more

TECHNICAL SKILLS

Analytics & Data Tools: Python, Pandas, SQL, Excel (VBA), Data Visualization, Jupyter

Analytical Methods: Trend Analysis, Dataset Structuring, KPI Tracking, Rubric Design, Failure Pattern Identification

Technical Systems: Docker, Linux, Git, Cloudflare

Business & Operations: Project Tracking, Stakeholder Reporting, Cross-Functional Coordination, Technical Writing, Team Leadership
